

MICROSOFT DYNAMICS 365 F&O – TECH.

CAREER OBJECTIVE

To work with an organization that gives scope to enhance knowledge and skills and to be part of a team that dynamically works towards the progressive growth of the organization.

PROFILE IN BRIEF

Having 10+ Yrs. Of experience in Microsoft dynamics 365 F&O, AX2012.

CERTIFICATIONS

- PL-900 Microsoft power platform fundamentals.
- AZ-900 Microsoft azure fundamentals.
- MB-500 Finance and operations app developers.
- MB-300 Core Finance and operations.
- MB-920 Microsoft dynamics 365 fundamentals (ERP)
- MB6-894 Development, Extension and Deployment for Microsoft dynamics 365 finance and operations.

MS DYNAMICS EXPERIENCE SUMMARY

- Design, development, unit testing and interacting with the client on business requirements.
- Develop and program in X++, COC, Event handlers, Extensions, Create and modify Table, Classes, Form, SSRS reports and Auto printing.
- Security framework.
- Sys operation framework and batches.
- Data management tool – data migration.
- Power app – Design and development of model-driven and canvas app.
- Trace parser – Performance analysis tool.
- Data refreshes from Prod to UAT, Test and Dev environments.
- Following the best practices for D365 F&O processes, user interface and architecture.
- Code movement strategy between instances, package deployment using LCS in different environments.
- Integration using logic app, Business events, Data events, Custom services, Odata.
- Understand functional requirements from high level document.

- Knowledge of modules production control, Planning optimization/Master planning, Inventory management, Warehouse management, AP, AR, Product information management.

SKILL SET

Language	X++
ERP	Microsoft dynamics 365 F&O, AX2012.
IDE	Visual studio.
Database	SQL server.
Operating system	Windows server.

EDUCATION QUALIFICATION

- Bachelor's degree in IT .

PROJECT SUMMARY

- Implementation – Car manufacturing.
- Implementation and support – Insurance.
- Implementation – Pharmaceuticals.
- Upgrade from AX 2012 R3 to D365 F&O.
- Implementation and support – Internal project
- Implementation – Manufacturing.

PROJECT(DETAILED)

Project	1
Team size	4-10
Role	Lead consultant
Environment	D365 F&O

Responsibilities

- Customization of medium to complex business requirements.
- Design and development of model driven and canvas app based on requirements.
- Implementation of planning optimization and replace the master planning.
- Design and develop all reports and labels as per business requirements also automate the printing.
- Customized different functionalities in different area like Positive/Negative stock adjustment, Journal creation, Posting, scrapping functionality on quality order, Zone for Open pick work, MI, release and move stock, Yearly counting process, Storage functionality – Storage Items, Receive and move items, Storage locations, transaction details and report.
- Handle the daily standup call, User stories refinement and Scrum call.
- Help the team when they need any assistance or support.

Project 2
Team size 4
Role Senior developer
Environment D365 F&O

Responsibilities

- Customization as per business requirements by following the FDD.
- Developed SSRS reports based on the requirements.
- Handle the small team and provide technical assistance when they need.

Project 3
Team size 6
Role Senior developer
Environment D365 F&O
Project Upgrade from AX2012 to D365 F&O
Team size 6
Role Senior developer
Environment D365 F&O, AX 2012R3

Responsibilities

- Resolving the code conflict, unit testing.
- Code customization, process modification.

Project Implementation and support – internal project
Team size 7
Role Consultant
Environment D365 F&O, SQL server 2012, AX2012

Description:

Internal project for data migration from AX 2012 to D365 F&O using data extraction tool in SQL server 2012, Data transformation using SSIS and loading into D365 F&O using data management tool.

Responsibilities

- SQL scripts for data extraction and transformation.
- Data management tool for data loading into D365 F&O.
- Resolution of issues occurred during data extraction, transformation and loading.

Project Implementation – manufacturing
Team size 5

Role AX-Technical consultant

Environment AX2012, SQL server 2012, Windows server 2012

Responsibilities

- 3-tier installation and configuration of AX2012.
- Customization in different modules AP, AR, Inventory mgmt., Product information mgmt.
- SSRS reports development as per requirements.
